AIR MATTERS

COLLECTION 2020/2021

FABER

AIR MATTERS

LEAVING A **NEW** IMPRESSION **IN THE AIR**

At Faber, we are always looking for innovative technologies and solutions inspired by nature that respect the environment so that you can live in better harmony with the planet at home.

IMPROVING AIR SINCE 1955, TO MAKE THE WORLD A HAPPIER PLACE.

There’s nothing we don’t know about air at FABER.
Our know-how in suction allowed us to invent the kitchen hood. Over the years we’ve moulded air into a thousand forms, just like steel, plexiglass, glass and wood.
As if by magic, we’ve compressed it, made it disappear and reappear from nowhere. We’ve turned the kitchen hood into an object of design and a work of art.
We’ve given it smart functions as a light fitting, air conditioner and filter and even connected it to the future.
Always quick to see how the world is changing, we’re still innovating today, to make tomorrow’s air even purer.

We use air technology in another way too: to improve people’s wellbeing and their quality of life. Living with a FABER hood means feeling protected in your home and natural environment. It means the satisfaction of comfort and versatility, and improving with every day that passes.
FABER works to make your wishes come true, to let you breathe the air of your dreams.
Everybody has a world of their own and we want to make it a happy one.

1955
Nasce Faber Plast.
Faber Plast is founded.

1958
La prima cappa in plexiglass.
The first Plexiglas hood.

PEOPLE ARE **OUR INSPIRATION**

At Faber, we know how to look far but also very close. **We look at people because they are our inspiration**.

Their needs, desires and dreams are the basic principles for which **we strive to supply better and better answers, time after time**. Everyday actions in a kitchen, even the smallest ones, tell of a daily routine that is a matter of careful study for us so they can be simpler, safer and more spontaneous for you. Everything depends on **wellness** of the people.

SAFETY IS IN **RELIABLE HANDS**

Reliability is a constant characteristic of all FABER products. It becomes easier to appreciate with time, a certainty. When everything is working as it should, home is a more relaxing place. And when the air is pure and clean, home becomes a place of true wellbeing. That's what reliability means to us: making life better for years to come.

RECORDS IN EXCELLENCE

- The first **ISO 9001** Quality Certification in the field of kitchen hoods.
- **SGS Certificate of Excellence n°001**: a worldwide first.
- Integrated Management System for Quality (**ISO 9001:2015**), Occupational Health and Safety (**OHSAS 18001**) and the Environment (**ISO 14001**) certified by SGS.
- Products conforming to the strictest safety requirements and to standards **EN 61591** and **EN 60704-3**, tested in an authorised in-house laboratory, certified and guaranteed by leading international bodies.

IMQ The Italian Quality Mark
CE The EU Safety Mark

CCC The Chinese Quality Mark

DREAM

TRENDY, CONTEMPORARY,
TECHNOLOGICAL.

Il design che esalta un’estetica distintiva, l’attenzione ai dettagli e l’innovazione per far vivere tutto il comfort dell’ambiente cucina come un’esperienza nuova.
Una cappa equipaggiata con le applicazioni più trendy del momento e le funzionalità più intelligenti, come timer, controllo remoto, connessione con i sistemi di automazione domestici.

EMOTION

TIMELESS, COMFORTABLE,
VERSATILE.

The technology that makes the kitchen more welcoming, turning it into the heart of the house.
Quiet, efficient and with a lower impact on the environment.
A hood that knows how to excite with the presence of natural materials, such as wood, and warm colours.
And it can create a laid-back atmosphere, hinting to tradition and packed with style.

SMILE

PRACTICAL, FUNCTIONAL, CURRENT

The simplicity that makes you love it and the ease of use that improves everyday life, with the certainty of constant and enduring reliability.
A hood that is also easy to clean and that satisfies all practical requirements while being remarkably effective in neutralising fumes, vapours and odours in the kitchen, making the environment even more comfortable.

Advanced technology for real life benefits.

FABER CLOUD

The exclusive Faber Cloud app can be used to monitor the air quality in your kitchen and adjust the main settings of your hood at any time, even from your mobile phone.

K-LINK

With the radio connection between the hood and Faber induction hob, the suction power is automatically adjusted according to the selected cooking level to optimise performance and avoid unnecessary waste.

AIR QUALITY SENSOR

Keep temperature, humidity percentage and the presence of volatile organic compounds under control in the domestic environment. The sensor automatically adjusts the suction power until perfect air quality is restored.

SIL & STILL

All hoods in the line-up already have a noise level at the maximum power of only 52 dB(A). The Eco Function can be activated by combining the effects of SIL & STILL TECHNOLOGY and the exclusive BRUSHLESS motor, for continuous 24-hour, energy-efficient air exchange in the surrounding environment, silently below 40 dB(A).

STEAM OFF SYSTEM

The dual action of the air entirely eliminates the condensation effect. The hood sucks in and at the same time emits jets of air that create a vortex to accelerate and facilitate conveying and capturing steam.

ZERO DRIP

Stop condensation! Zero Drip collects it in a frame preventing it from dripping onto the hob. Zero Drip Plus makes it evaporate thanks to the specially heated glass of the hood.

AIRLANE

Maximum suction through an invisible passage. A second motor in the ceiling is activated automatically when the hood is switched on.
Fumes and steam are captured by the second motor to purify the air of the entire environment and ensure maximum comfort.

UP & DOWN

The hood descends onto the cooker hob to optimise suction and then rises and disappears completely into the ceiling when it has finished, clearing the space altogether.

NAUTILUS

More power, less noise, superior comfort!
Faber technology increases suction capacity by 30 m3/h, reduces noise and improves efficiency, always with minimal consumption.

ARIES

With the power of two brushless motors, Aries achieves a suction capacity of over 700 m3 abating noise by 9 dB(A). The superior, energy-saving and quiet performance of Aries puts vertical hoods in Class A.

BRUSHLESS

The brushless motor guarantees considerable energy saving coupled with high extraction efficacy. It is the most silent motor on the market and its performance remains stable in any usage condition.

REMOTE BLOWER

Available on many products, it allows you to install the motor away from the hood to reduce the noise in the kitchen. For acoustic comfort at the highest level.

PERIMETER ASPIRATION

25% less* perceived noise. Perimeter suction exploits the Venturi effect to accelerate the air flow through a narrow gap. The air slows down again once inside the hood for more efficient extraction.

*Equivalent to a reduction of 3 dB(A) according to EN 60704-3.

WATERPROOF

Any liquid spilled during cooking flows directly into a suction grille and is collected in an automatically drained tray under the hood, small enough to leave space for a utensil drawer.

POWER MANAGEMENT

Adjustable absorption setting on 4 power levels (KW). No more blackouts at home!

HFH FILTERING

Capable of eliminating 95% of bad smells, the technology guarantees maximum effectiveness in activated carbon filtering. HFH technology makes the hood more efficient for air purification from all odours..

FILTER ALARM

Filter saturation alarm: warns you when it is time to clean the anti-grease filter or substitute the anti-odour filter.

REAR OUTLET

The rear air outlet available with many FABER hoods allows fumes to be channelled to the rear instead of upwards. This eliminates the need for an upper duct, freeing up useful space above the hood.

SELF START

A special sensor switches the hood on as soon as air temperature reaches 35°C. A smart sensor activates your hood automatically whenever needed. Faber loves to make cooking easier and more enjoyable!

AUTOMATIC FUNCTION

The hood will turn on at the most suitable speed automatically, adapting the extraction capacity to the maximum cooking level.

HOUR 24

Key 24: function which allows the hood to be switched on for 24 hours a day for air renewal with a level of noise that is imperceptible.

LED LIGHT DIMMER

Dimmable light: at the touch of a button the light is dimmed down and can be left on for a long time with minimal energy consumption.

TUNABLE WHITE

On some models, you can choose and vary the colour temperature of the light, from warmer (tending to yellow) to colder (tending to white).

DELAY 30

Automatic shutdown delay: you can postpone the motor shutdown to eliminate residual odours completely.

SPEED I

Intensive speed: function which activates maximum aspiration for 6 minutes to meet special cooking needs.

SOFT TOUCH

FENIX®, a high-tech material with unique characteristics. Soft and smooth to the touch, matte and smudge-proof surface.

ANTI TOUCH

Special smudge-proof materials for a perfectly clean hood and a surface without annoying stains.

BOOST

Thanks to the Double Intensive Function. Even the most persistent cooking steam and smells are eliminated in just a few minutes.

LED LIGHT

Thanks to the LED lighting you will have a brilliant light and excellent visibility over the entire cooking area, with a considerable energy saving.

TOUCH CONTROL

Extremely comfortable, user-friendly Touch Slider controls.

REMOTE CONTROL

The new remote control is compatible with many Faber hoods. To adjust suction and special functions, such as the courtesy light, 24H, Up&Down and Steam Off features.
Controlling your hood is easier than ever.

K-LINK TECHNOLOGY
AND THE HOOD ADJUSTS ITSELF AUTOMATICALLY

FREE HANDS IN THE KITCHEN. THANK YOU, FABER
The beauty of cooking is also that you can express yourself freely, without distractions. If you have an induction hob and a Faber cooker hood with K-LINK connection, just start cooking and the suction power of the hood automatically adjusts to the selected cooking level.

HOB AND HOOD DIALOGUE WITH EACH OTHER
Faber has created an intelligent connection between hob and hood, through an integrated system that works with radio waves.
A simple gesture is all it takes to set the hood to automatic operation. The system is always active because the radio signal is never interrupted.
At the same time, the perfect operation of the hood is guaranteed avoiding the waste of energy and excessive noise that you could have set the suction at a level too high compared to the produced fumes.

The connection is always active even in the presence of dirt residues on the hob.

It can be controlled manually whenever you want.

Models of hoods prepared for connection with Faber induction hobs.

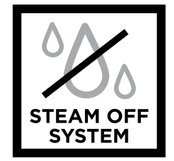
CONDENSATION IS NO LONGER A PROBLEM



FABER ELIMINATES THE PROBLEM OF CONDENSATION

Eliminating condensation is essential to protect the wall unit where the hood is installed and to prevent drops of moisture from falling onto the hob. Faber has succeeded by creating special anti-condensation systems of total effectiveness.

STEAM OFF SYSTEM

The Steam Off System implementing Faber exclusive technology eliminates the problem from the beginning, avoiding the formation of condensation.
While sucking in, the hood emits controlled jets of air that by whirling and accelerating, promoting the upward movement and convey the vapours to capture them all.

ZERO DRIP

The Faber Zero Drip and Zero Drip Plus systems stop condensation after it has formed. The first one collects it in a groove preventing it from dripping onto the hob. The second makes it evaporate through contact with specially heated surfaces.

ZERO DRIP

ZERO DRIP PLUS

Pressing a button on the glass part of the hood activates a heating resistor that makes the condensation evaporate completely.

SILENCE THAT RESPECTS NATURE

THE FIRST COMFORT IS SILENCE
To make the kitchen a comfortable environment to live in, it is essential to have a hood that works making as little noise as possible, even at top power.

SIL & STILL TECHNOLOGY
Based on the study of aerodynamic flows inside the hood and targeted sound insulation, this Faber technology reduces noise at top power to just 52 dB(A). By activating the Eco Function, it ensures continuous air exchange in the surrounding environment for 24 hours, silently and with minimum consumption below 40 dB(A) comparable to the quietness of a library.

BRUSHLESS MOTOR
Faber is constantly looking for technologically advanced solutions and with this motor, it guarantees the best energy efficiency on the market.

REMOTE BLOWER
The noise of the hood can be minimised by moving the motor away.

Models with technology SIL & STILL

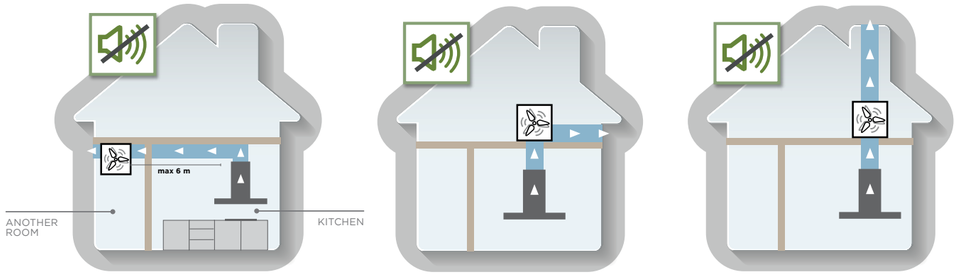
ONYX-C ONYX-V ONYX-T

THE SILENT PLEASURE OF A REMOTE MOTOR

REMOTE BLOWER

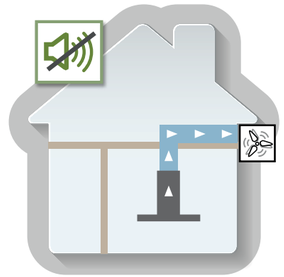
REMOTE SUCTION KIT
The remote suction kit, with the utmost simplicity, makes it possible to move the hood motor away from the cooking area.

THE SILENCE INCREASES SIX METRES AWAY
With the Remote Suction Kit, the motor can be moved to another location of the house up to six metres away from the hood. Minimal noise and maximum comfort are ensured not only in the kitchen but also in the living area.



The model with the dedicated range of hoods is shown in the Accessories section on page 316

REMOTE EXTERNAL MOTOR
The remote external motor makes it possible to install the motor entirely outside the house and eliminate noise altogether.



The model with the dedicated range of hoods is shown in the Accessories section on page 316

SOFT LINE
REVOLUTIONISES DESIGN

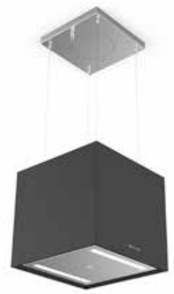
Soft Line is the Faber range of hoods made with FENIX®, a high-tech material with unique characteristics.
The matte, smudge-proof surface is soft to the touch and reflects very little light. It is non-porous to facilitate daily maintenance and cleaning.

FENIX® is a material with high resistance to scratches, abrasions, dry heat and acids. Its properties make it perfect for kitchens.
Another characteristic is that it can self-heal surface micro-scratches.

FENIX®

USED AS A KITCHEN TOP IT IS A PERFECT MATCH FOR THE HOOD.

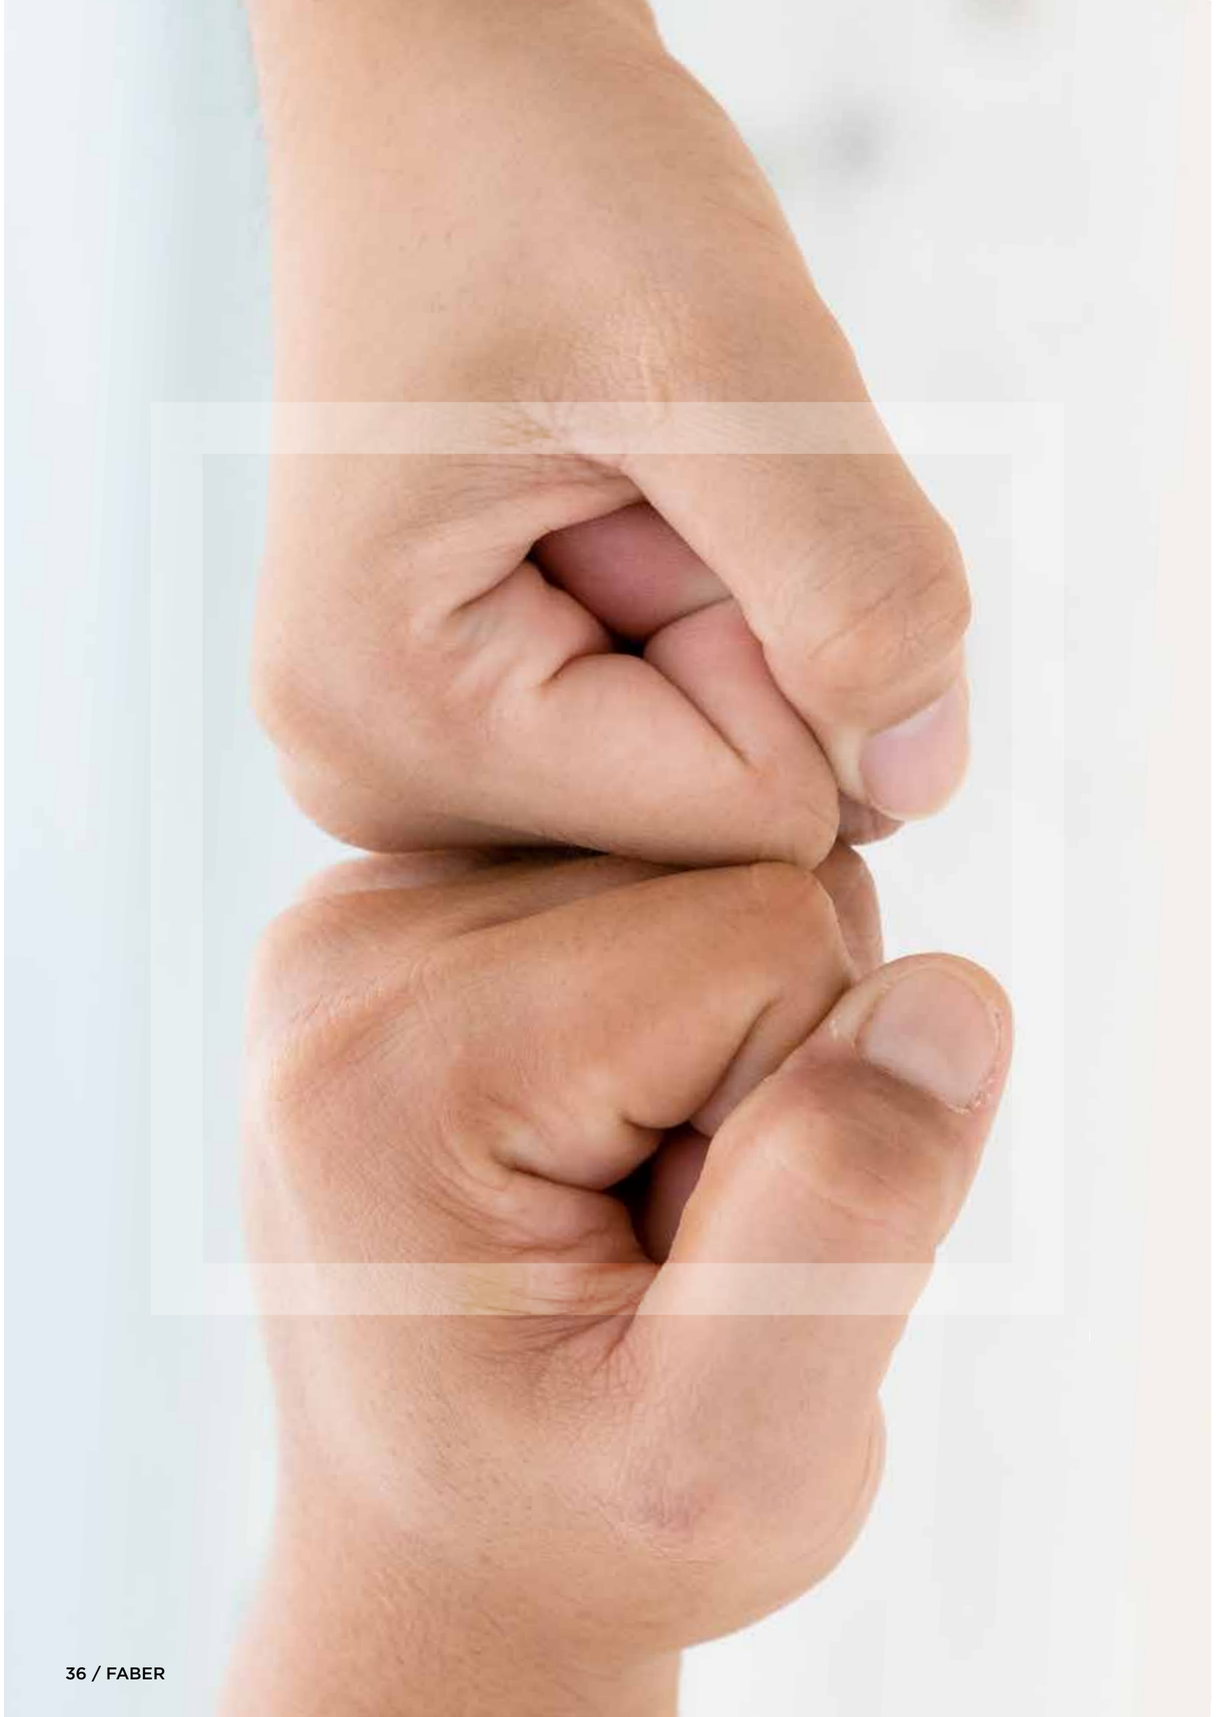
The Faber Soft Line consists of a suspended hood F-light (Soft Cube) and two vertical wall-mounted hoods (Soft Edge e Soft Slim).
They are all available with three FENIX® finishes: Grigio Londra, Bianco Kos or Nero Ingo.



SOFT CUBE

SOFT EDGE

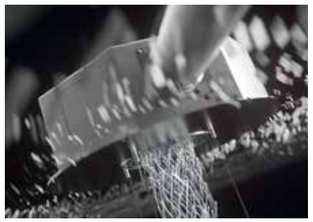
SOFT SLIM

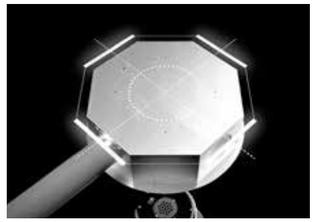


AIRLANE TECHNOLOGY
SUPERB EXTRACTION THROUGH AN INVISIBLE DUCT

REAL POWER MAKES NO NOISE.
IT KEEPS THE SECRET.
AIRLANE TECHNOLOGY can be used to install more than one Faber suspended hood in suction mode without the presence of unsightly connection pipes. In this way, you can have a hood and light cluster that integrates perfectly into the décor of your kitchen.

THE POWER OF A DOUBLE SUCTION.
With AIRLANE TECHNOLOGY a second motor in the false ceiling conveys fumes and cooking vapours sucked from the hood without piping.





Discover the technology video on our YouTube channel [faberairmatters]

Airlane conceals a second motor in only 30 cm of false ceiling allowing you to choose between four air outlet positions during installation.

UP&DOWN TECNOLOGY
FREEDOM OF MOVEMENT IS IN THE AIR

In open-concept kitchen and living room combos and in those where space is restricted, there is often the need to choose a suspended hood with a design matching the interior décor.
Faber solves these needs by combining the function of a hood with that of a light fitting.

THERE'S A HOOD: IT'S IN THE LIGHT FITTING.
With the Up & Down technology, Faber perfectly integrates hood and light fitting, combining the needs of aspiration with those of design and lighting.

AN AMAZING SPACE-SAVING SOLUTION.
These hoods are excellent space-saving solutions capable of illuminating and enhancing any type of environment, from the most linear to the most sophisticated.

UP & DOWN: NICE MOVE IN THE KITCHEN.
DOWN: The hood moves down to illuminate the hob and optimise suction while cooking.
UP: The hood returns to the ceiling to form an elegant light fitting. And FABER's brand-new remote control makes movement easy.

F-LIGHT: MOVE IN CLASS A.
All F-Light models with their energy efficiency go far while bringing comfort closer.

HFH TECHNOLOGY
NO BAD SMELLS

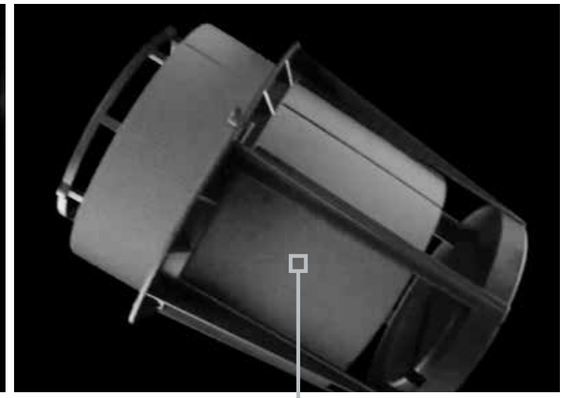
HIGH FILTERING

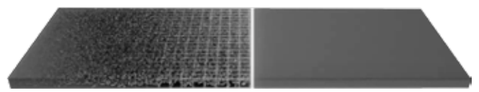
ONLY FABER HOODS ELIMINATE 95% OF ODOURS.
What's the most effective activated carbon filtration technology? It's called HFH, which stands for "HIGH FILTERING HOOD". And it's a FABER exclusive, of course. HFH improves hood performance by removing odours from the air almost totally.

A LARGER SURFACE AREA AND TWO LAYERS OF ULTRA-EFFICIENT FILTER MATERIAL.
Faber's potent HFH technology is based on a cylindrical filter design with a far larger surface area. It's twice as effective too, because it uses two high-effciency filtration layers with different porosities and activated carbon concentrations. That's how the filter captures both large and small particles.

FABER MAKES THINGS EASIER...QUIETLY.
Unlike other activated carbon filter systems, HFH also reduces noise by around 3 dB(A). And the smart, cylindrical shape of the filter makes easy work of removing the dishwashercompatible filter material.

The **easy-to-install** cylindrical filter has a larger area compared to conventional ones guaranteeing more effectiveness.





Ultra-filtering material consisting of two panels with different porosity and concentration of active carbon.
The first layer captures the coarsest particles and the second smaller ones, increasing effectiveness even more.

Dishwasher safe.

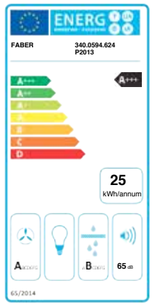
GREEN INNOVATION
THE FUTURE IS IN OUR HANDS

WE ALSO THINK ABOUT THE PLANET
Making sustainable choices is essential to respect the world we live in. Therefore, it is important to choose a hood that is energy-efficient. By developing solutions aimed at lower environmental impact and greater energy savings, Faber also takes care of the planet

LED LIGHT
All FABER hoods incorporate LED lighting technology.
The LED units consume next to nothing and produce a pleasantly natural light that ensures perfect visibility without altering colours

HIGHER CLASS ENERGY
Today, Faber hoods are confirmed in the highest energy classes. They ensure superlative performance and minimum consumption of the suction motor, filtering system and lighting. The top-of-the-range Galileo hob extractor achieves excellence in Class A+++.



Energy Efficiency Class: hoods with the highest ratings (A++, A+, A) consume less and are more respectful of the environment (green colour).
Annual Electricity Consumption: calculated for standard hood functioning times (60 minutes of suction and 120 minutes of lighting a day).
Fluid-dynamic efficiency: reveals the quality and power of the hood: efficiency rises as suction power increases or energy consumption decreases.
Lighting efficiency: this indicates how much light the hood produces for the energy it consumes; for the same lighting power, more light-efficient hoods consume less.
Filter efficiency: indicates the filter's capacity to capture grease.
Noise level: measured in dB at the hood's maximum fan speed (not boost).

AIR TREATMENT

AIR TREATMENT
AIR QUALITY IS ALWAYS UNDER CONTROL

FABER CLOUD

AIR QUALITY SENSOR

HOODS CONNECTED TO YOUR WORLD
All hoods in the AIR TREATMENT by Faber range fit an Air Quality Sensor. This innovative device monitors the air and activates suction if it detects the presence of allergens, pollutants or odours.
By storing data on the Faber cloud, via an app that can be downloaded to smartphones, you can monitor the air quality at home at any time, even remotely.

K-AIR WITH INTEGRATED MONITOR
K-Air is an intelligent vertical hood with a built-in 21" monitor that can be controlled directly via the touchscreen or app.
The exclusive Sensor Air Quality keeps the temperature, the percentage of humidity and the presence of volatile organic compounds (VOC and VOC), Carbon Monoxide and Nitrogen dioxide and methane under control in the domestic environment.
The sensor activates the hood as soon as pollution thresholds are exceeded, primarily in the space where you cook.

THE IDEAL SOLUTION FOR YOUR **SMART HOME**

MONITORS INDOOR AIR QUALITY AND RESTORES FRESH AIR IN YOUR KITCHEN

YOUR FAVOURITE WEB PAGES ACCESSIBLE ANYTIME, CONNECTION TO YOUR INTERNET BROWSER
(AVAILABLE ON K-AIR MODEL)

THANKS TO THE FABER CLOUD, YOU CAN ACCESS IT FROM ANYWHERE AND CHECK YOUR HOME ENVIRONMENT

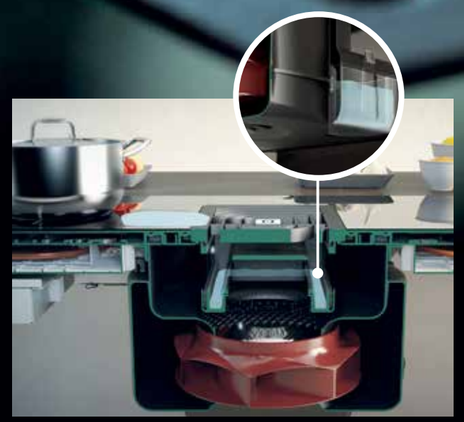
GALILEO NG
DREAM

HOB EXTRACTOR

GALILEO.
Una cappa simplemente geniale.

A+++ ENERGY

THE MOST EFFICIENT.
The pinnacle of aesthetic perfection with the integration of cooktop and hood in a single product for outstanding performance.



WATERPROOF

MAXIMUM SAFETY IN THE KITCHEN.
Waterproof technology guarantees operation and safety even in the event of liquids spilling onto the cooktop. They do not interfere with the cooking and are collected in a special compartment below.

SUCTION SPEED

THE MOST EFFECTIVE.
With its clever fluid-dynamic design, Galileo stands out for its high collection capacity of up to 6.6 metres per second. Even the most persistent cooking vapours and smells are eliminated in just a few minutes.

EASY TO USE.
The cooktop surface is smooth and seamless allowing dirt to be removed in one simple step.

SPACE SAVING

SPACE SAVING.
In the base cabinet Galileo has a smart drawer where you can easily storage cooking utensils.

TOUCHSLIDER

EASY TO USE.
The convenient and user-friendly touch slider controls allow you to adjust the cooking zones and the suction level with a simple action.

[2] BRIDGE ZONE

UNLEASH YOUR CREATIVITY.
The cooking zones can be activated in combined mode to use them together with the same level of power, ideal for cooking food in large pots.

USEFUL
The grease filter is extremely efficient and is also functional because it works as the first barrier and can collect up to 0.5 litres of liquid. It is easily removable and dishwasher-safe.

HOB EXTRACTOR

Hoo-B Glass
Black glass

Hoo-B
Black glass / Aluminium

HOO-B COOKTOP,
THE NEXT-GENERATION FITTED HOOD

A sophisticated yet minimalist look for the new fitted HOO-B hood, which is embellished with a special aluminium trim that makes it even more stylish.
The glass panel fits over the hob without interrupting the continuity of its forms and lines, guaranteeing the utmost quality at all times. The Touch control commands also make it possible to operate the hood and induction hobs with the touch of a finger.
When in use, HOO-B opens, lifting its cover and revealing its extraction surface. When you have finished using it, the cover goes back down to create a single worktop again.
For those that love pure minimalism, the new model also comes in the HOO-B Glass version with no aluminium trim.

The Suspended cooker hoods were created to represent the perfect integration of design and wellbeing. The design is absolutely extraordinary and astounds the observer due to its ability to revolutionise the concept of cooker hood lighting, transforming it into a real point of light for the kitchen area.
The products are technologically advanced and perfectly shaped, offering the user freedom of movement within the cooking zone. In a simple movement, elegance becomes functionality.

ADVANCED TECHNOLOGY, UNIQUE DESIGN
As beautiful as its name suggests, the Belle hood features a design that is both eye-catching and elegant. Its double panel creates an effect reminiscent of the petals of a flower. Available in two refined finishes, the original, asymmetrically shaped Belle hood is made even more desirable by Up & Down action and by the technology that has made Faber the number one name in kitchen hoods.

CEILING

Black Glass/Stainless steel

YOUR KITCHEN'S SILENT GUARDIAN.
Look up and you'll appreciate its linear design, but otherwise Onyx-C blends into the background, and all you notice is the pure air.
Onyx-C incorporates FABER's exclusive SIL & STILL technology. This new technology includes an Eco button that activates an ultra-silent mode to bring your kitchen maximum comfort with minimum energy consumption. The button's green light is the sole proof the system is working. The silence is broken only by applause for the Faber technology that places the hood in energy efficiency class A++.

The form and precious materials of our wall hood designs have been carefully studied to be visually pleasant and to last over time.
They utilise powerful motorisation and refined aspiration systems to guarantee clean air and silence.
Our hoods provide useful special functions for a clean environment, to keep your home under control, to leave you free to manage creativity in your kitchen.

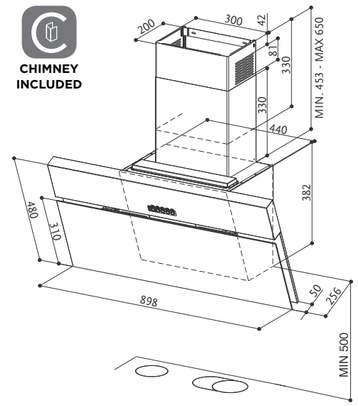
ECO FUNCTION:
change of air with minimum consumption and maximum silence.

THE POWER OF SILENCE.
A vertical hood with elegant, essential design on the outside and amazing innovation inside. Onyx-V features SIL & STILL technology to ensure a continuous exchange of air in the kitchen, in complete silence and with very low consumption.
Is it on or off? The only way to know the hood is working is the green function indicator, which turns off automatically after 24 hours. The impressive suction power and amazing silence of Onyx-V creates the ultimate comfort in your home. Onyx-V is as efficient as it is silent, and is rated energy class A++.

CHIMNEY INCLUDED



To be installed at a minimum distance from the hob of **50 cm.**

FLAT ON THE OUTSIDE, ARIES TECHNOLOGY ON THE INSIDE. TWICE AS UNIQUE.
Twice is the perfect fusion of design and performance.
This flat vertical hood is the work of the designer who created the acclaimed Talika hood, and his unmistakable style emerges clearly from its rigorously essential lines. The glass from which it is made gives Twice the appearance of a latest-generation touch screen device. The hood's elegant, refined body encloses innovative, precision technology – a brand new Aries blower for superior suction. Maximum performance with minimum noise from a Faber masterpiece available in two different colours.

UNCOMPROMISING TECHNOLOGY AND DESIGN BY COLOMBO FOR A HOOD THAT GOES BEYOND INNOVATION.
The Pyana hood is the result of continuing collaboration between Faber and the internationally famous designer Carlo Colombo. This vertical hood offers the ultimate in style and performance.
Pyana features a precious, gloss-finish body with gently rounded corners and an internal glass panel with an exclusive opening system. The hood comes in two colour variants. Customers can also choose between two advanced blower technologies: Nautilus or the new Aries, both guaranteed to deliver superb efficiency with minimum consumption and, of course, maximum comfort.

IMPROVING ON PERFECTION.
Faber's famous vertical hood is re-inventing its role as "window over the hob" by adopting the latest Nautilus technology.
The new Nautilus blower not only improves performance but makes Talìka an even more desirable addition to your kitchen by reducing noise yet again. Unprecedented comfort from a lightweight, ultra-thin hood now available in new finishes.

Chimney finish:
RAL Design 000 85 00

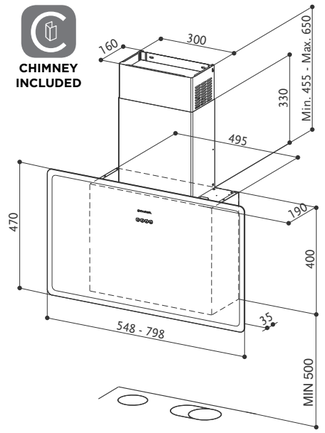
A VERTICAL HOOD WITH THE LATEST NAUTILUS TECHNOLOGY.
Glamorous by name and nature, the Glam-Fit hood is characterised by a minimal, contemporary style that radiates elegance in every detail.
Its clean, essential lines, complemented by a glass surface and an elegant clear surround, add refinement to any kitchen and conceal Faber's exclusive Nautilus technology.
The first ever completely flat, vertical glass hood, Glam-Fit also features an ultra-thin body of only 15 cm. Impressive performance and miserly consumption place it in energy efficiency class A. Glam-Fit comes in two finishes, black and white, both equally striking and typically Faber. Glam-Fit is also available in a "small" 55 cm version.



To be installed at a minimum distance from the hob of **50 cm.**

ECO FUNCTION:
change of air with minimum consumption and maximum silence.

AS SILENT AND PRECIOUS AS PURE AIR
Onyx-T is the quietest of all T-Shape hoods and guaranteed to amaze for its high performance and low noise. The hood's stylish design conceals FABER's exclusive SIL & STILL technology which allows functioning in ultra-silent mode at a sound level of less than 40 dB(A). Maximum comfort, minimum energy consumption and complete freedom to enjoy your home thanks to a continuous exchange of air signalled only by a green light in the Eco button. The Eco function even switches off automatically after 24 hours. What more can we say? Faber technology leaves you speechless!

STYLE IN EVERY DETAIL, TECHNOLOGY IN EVERY BREATH.
Today, the world is one nation, the whole planet a global village. And the pleasure of country living has reached even the biggest metropolis. Today is the era of Thea. This is a hood that looks beyond the walls of your kitchen, opening up new horizons in design and redefining life in the home. But take nothing for granted! Despite its vintage soul, this hood packs the performance needed for today's industrial world.

Perfect in their every detail, extremely powerful, ideal for all-round kitchen use. Island workstation kitchens take on a central role in the house and in daily family life: cooking instantly develops into personal flair, passion, choice, an intimate, private activity. Island decorative hoods are attractive from all viewpoints, with perfect form in all its features: there is no hidden side or corner not seen by the naked eye. Characterised by symmetry and uniformity, illuminating the centre of our family lives.

ELEGANT INDUSTRIAL STYLE
T-shelf is the iconic island hood with an elegant industrial style. With its trellis structure, exclusive smoked glass shelves and double LED bar with dimmer, this practical and smart solution contributes to complementing the kitchen environment.

Country grey matt - CG MATT

UNIQUE PERSONALITY EXPRESSED IN PERFORMANCE.
Some ideas cast new light on everything around them: even colours, flavours and everyday gestures. In a dull, uniform world they epitomise newness, inspire beauty and establish a new sense of proportion. Chloè XL Isola is one of these ideas. Designed to take style to a higher level, Chloè XL Isola adds the excitement of broader horizons and new dimensions to your kitchen.

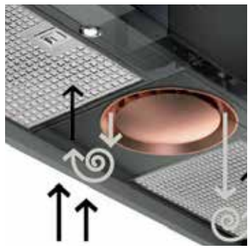
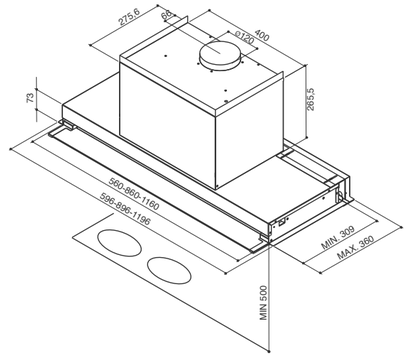
EXCLUSIVE,
CONDENSATION-FREE COMFORT
With Steam Off System, the exclusive Faber technology, in addition to the suction phase, the hood also emits air jets that create a vortical motion and acceleration and help to convey and capture the steam.
This puts an end to condensation and its depositing under and around the hood.
DOUBLE AIR ACTION TO COMPLETELY ELIMINATE CONDENSATION.





To be installed at a minimum distance from the hob of **50 cm.**

FABER FOREST AIR

LET'S CHANGE THE AIR OF THE PLANET

FABER TEAMS UP WITH THE TREEDOM REFORESTATION PROJECT
Improving the quality of the air we breathe has always been the goal and dream of Faber. The objective is in tune with the the need of planet Earth to fight air pollution. It is also a real commitment expressed by supporting the Treedom reforestation project.

FORESTS MAKE OUR PLANET BREATHE
All trees are good for the environment. They absorb CO2, emit oxygen, promote biodiversity and much more.
The trees of the Treedom project are also good for the farmers who grow them and draw nourishment and sustenance from them.

FABER FOREST AIR
To support the Treedom project, Faber purchased 200 cocoa trees in a small forest in Cameroon.
All customers who purchase a Country cooker hood, either online or through retailers, will become the custodians of a Faber Forest Air tree and will be able to follow its growth from home.

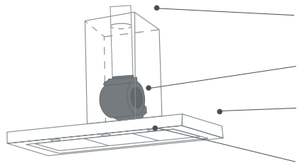
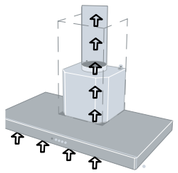
INSTALLATION

ABC OF THE HOOD

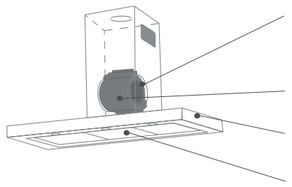
The extraction hood expels fumes and steam out of the kitchen. It is the most effective solution.



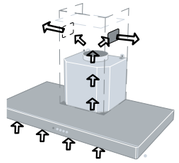
- Air ducting system (brings air out)
- Extraction group (sucks air)
- External body
- Anti-grease filter (protects the motor from grease damage)



The recycling hood filters the fumes and steam from the air and then returns it to the kitchen.



- Charcoal filter (filters the air from the odours - only with filtering hoods)
- Extraction group (sucks air)
- External body
- Anti-grease filter (protects the motor from grease damage)



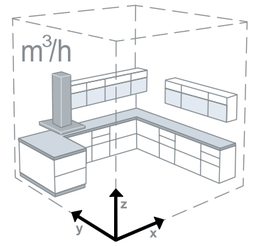
CHOOSE THE RIGHT HOOD

The necessary extraction capacity is determined by the volume of the kitchen. An effective hood changes the air of the kitchen 10 times per hour. A powerful motor is quieter and uses less energy because it is effective at low speeds.
-A hood does not create noise disturbance if its capacity is sufficient without exceeding 55 dB(A) of sound power.
-A powerful motor can be efficient even at lower, quieter speeds.
1 Fan Handbook - F. Bleier 1998

Example: A 15 m² kitchen which is 3 m tall requires a hood which aspirates at least 450 m3/h. Infact: 15 m² x 3 m x 10 = 450 m³/h
Now consult the performance table found in the product catalogue.
The hood is efficient if an equal or higher capacity value is found in one of the speed columns.

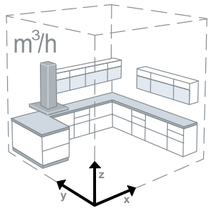
EFFECTIVENESS = kitchen m² x kitchen high x 10 changes of air

Speed	1	2	3	4	INT
Air capacity IEC point	110	195	260	313	430
Pressure	-	-	-	-	-
Input	30	45	55	70	100
Noise level	48	53	58	62	69

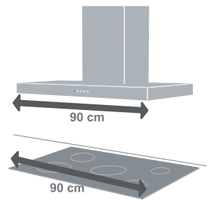


INSTALLATION

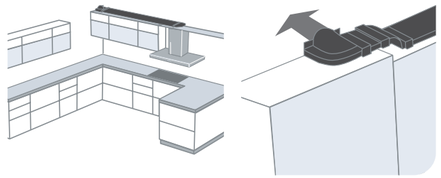
Proper installation begins with an inspection. When choosing a hood, you should know:



Kitchen volume (which determines the necessary aspiration capacity). See section “Choosing the right hood.”



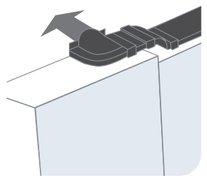
Length of the cooking top (the hood is generally as long as the cooking top area).



The position and distance of the exit hole (very long and very curved right-angled tubes limit hood efficiency).

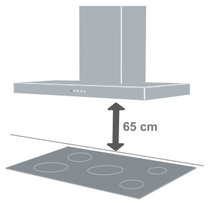
Italian D.M. 37/08 requires two aeration holes which communicate with the external wall in the presence of gas-working equipment.

1. an entrance hole for oxygenising the area, to be made in the lower part of the wall of the room which communicates externally.
2. an exit hole for fume discharge, to be made in the upper part of the wall which communicates externally (or in a chimney flue dedicated exclusively to this use). If the hood aspirates, the exit hole can be used as a terminal conduit that carries the air outside.



Product integrity
- Check the integrity of the hood upon opening.
- Make sure that the hood is in good conditions and has not been damaged during transport.
- The hood must arrive with its guarantee and instruction manual. Verify the receipt of any optionals (i.e. remote control).
ATTENTION: Do not install the hood if it is damaged. Have it substituted at no charge with a new one, otherwise you may be required to pay for any service assistance. Do not remove any protective films prior to installation.

Installation distance



The hood is to be installed at a minimum distance of 65 cm from the cooking top, except for particular models where is specified in the technical drawing and instructions manual.
ATTENTION: the product guarantee will not be considered valid if this distance is not respected.
The hood may not reach declared performance levels if the distance from the cooking top exceeds 75 cm.
Some vertical-installation models (ex. Cocktail) are to be installed lower. Check the product’s technical manual.

Inspection

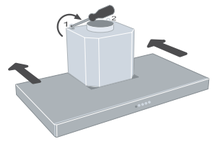
1 - Turn on the motor
2 - Switch on the lights
If the hood is an extraction hood, verify that it is properly connected to the exit tubing.
If the hood is a filtering hood, verify that the charcoal filters have been inserted.

First cleaning

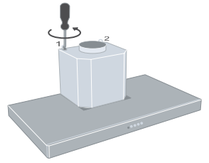
- Remove the protective films
- Remove impurities with a damp sponge and a small amount of neutral soap
- Rinse with a damp cloth
- Dry with a soft cloth. If the hood is in stainless steel, continue with a steel glaze
- You can give stainless steel hoods a protective treatment with the Faber Clin&Clin tissue

EASY CUBE

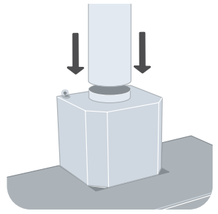
Faber hoods are easy to install because they have EASY CUBE:



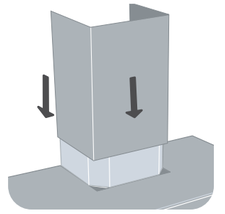
Hang the hood



Align



Connect tubing



Insert the chimney

USO E MANUTENZIONE

USE AND MAINTENANCE

Accendere la cappa un minuto prima di iniziare a cucinare per creare un flusso d’aria che convogli fumi e vapori verso la superficiedi aspirazione.
Lasciare, se serve, la cappa accesa anche dopo la cottura fino a che siano stati aspirati tutti i vapori e gli odori.

Switch on the hood a minute before cooking begins to create air flow that channels fumes and steam toward the aspiration surfaces.
If necessary, leave the hood switched on even after cooking is finished so that all steam and odours can be properly aspirated.

- Wash the metal anti-grease filters by hand or in the dishwasher every two months[1]
- Replace synthetic anti-grease filters every two months
- Regular filter maintenance guarantees efficient hood use
ATTENTION: grease deposited on the filters is inflammable: be sure to perform regular maintenance

[1] These intervals of time refer to a regular use of the hood, approximately 3 hours per day

Hood cleaning
- Remove impurities with a damp sponge and a small amount of neutral soap[2]
- Rinse with a damp cloth
- Dry with a soft cloth, if the hood is in stainless steel, follow the steel brushing
- Clean the internal hood conduit once a year

[2] Acid-based cleaning products can damage hood surfaces

ANTI-ODOURS FILTERS

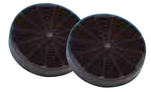
Long Lasting

3
YEARS
MAX

Faber has developed a new, re-usable active carbon filter. Thanks to the multi-layer technology, the Long Lasting filter further increases filtration efficiency, with the double layer using an initial pre-filtration to capture the largest particles, and a second, more concentrated filtration to guarantee optimal air cleanliness.
The filter can be washed in the dishwasher every 3-4 months[1], for a maximum of 3 years and dries at room temperature in a vertical position to allow the water to drain out. Alternatively, it can be placed in an oven at 50°C.

[1] Normal use cooker hood, by around 3 hours per day

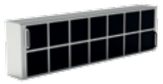
High Performance



6
MONTHS
MAX

High-efficiency filter with a highly-concentrated carbon micro-granular structure that can guarantee more than 80% filtration capacity of intake fumes and a duration of up to 6 months, double that of a normal charcoal filter, making for economic savings of more than 20%.

CERAMIC FILTER



Innovative charcoal filter that can be rigenerated in the oven at 200° every 2-3 months and allows to reach high absorption efficiency

CLIN & CLIN CLEANING LINE

Clin&Clin revitalising paste

Removes marks, spots and small rust stains caused by daily use, restoring a natural shine to steel surfaces.

Clin&Clin protective tissues

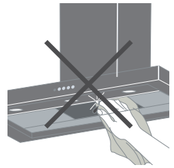
Protect and maintain the beauty of steel surfaces over time.
Practical and disposable. To be applied on clean, dry surfaces.

QUALITY AND SAFETY

Faber hoods benefit from 60 years of competence in the treatment of kitchen air

- We were the first in the kitchen hood sector to obtain an ISO 9001 company qualitysystem certificate.
- System integrated with Quality, Safety and Environment certified by SGS respecting the ISO 9001:2000, OHSAS 18001 and ISO 14001 norms.
- We have received the SGS Excellence Certificate, the absolute first in the world, number 001.
- All Faber hoods conform to European safety standards (EC mark of conformity), and have also been certified by the IMQ, a reliable, independent organisation further guaranteeing clients on quality (IMQ mark of security).

FABER HOODS ARE DESIGNED FOR SAFETY



Hammered internal edges and tempered glass to avoid risks of cutting.

Thermo-protected motors and self-extinguishing plastics help avoid any risk of fire.
Electronics are solid state, cables and connections are all placed correctly to avoid electric shock or dangerous sparks.

All Faber hoods have undergone safety and performance tests.
Aspiration and noise capacity have been measured according to standard norms:
- EN 61591
- EN 60704-3
unique specifications for surveying kitchen hood performance.
ATTENTION: Comparisons between different brand hoods should be carried out on complete data obtained according to these standards.
The Faber laboratory is NEMKO and IMQ certified.

ASSISTENZA

ASSISTANCE

Contact Number
0732.691691

Our toll Contact Number can be reached from Monday to Friday from 8am to 8pm and Saturday from 8am to 2pm for the following service assistance:
- Information about products
- Information about shop branches
- Information about where to purchase spare parts and accessories
- Activation of technical assistance request
- Product or service complaints

The cost of the call may vary depending on the operator used.
Please consult the rates of your operator.

Faber Technical Assistance is also active in Europe

Check the website www.faberspa.com for phone numbers

All Faber products are covered with a 2-year “Full guarantee”

“Full guarantee” that covers any compliant defects which might be revealed on the hood over this period.
This guarantee does not cover defects not attributable to Faber such as those caused by erred installation, by any use not compliant with the instructions detailed in the instruction manual or by damage caused during transport.

Dusty blue RAL 240 60 15

Sand RAL 0508010

Titanium matt RAL 7048

The performance shown in this catalogue is declared in accordance with the new Code of Conduct signed by the most qualified European manufacturers members of CECED (European Committee of Domestic Equipment Manufacturers), a strict code for transparency which establishes clear rules to measure air flow and noise level for hoods, common to all cooker hoods manufacturers:
- air capacity according to IEC/EN 61591 method (with the hood fitted using a ducting pipe)
- noise level according to IEC/EN 60704-3 method (sound power)
