POHIŠTVO ZA ZDRAVE NOĆI

Spalnica je v vsakem domu eden najbolj zasebnih prostorov, v katerem preživimo veliko ur. Res največ od teh ur prespimo, a je vseeno pomembno, da je spalnica ukrojena po naših merah, v nam ljubih barvah in premišljenih oblikah. Še bolj pa je pomembno, da materiali, iz katerih je narejena, omogočajo zdravo spanje. Surovine, ki jih uporabljamo, so rezultat trajnostno naravnane krožnega gospodarjenja, pri izdelavi se uporablja recikliran les in lepila z minimalno vsebnostjo topil. Tako ustvarjen bivalni prostor nas pospremi v mirno noč in zbudi v svež nov dan.

NAMJEŠTAJ ZA ZDRAVE NOĆI

Spavaća soba je jedan od najintimnijih prostora u svakom domu u kojem provodimo mnogo sati. Doduše, većinu ovih sati provedemo spavajući, no ipak je važno da spavaća soba bude prilagođena našim mjerama, u našim omiljenim bojama i promišljenim oblicima. Još je pak važnije da materijali od kojih je napravljena omogućavaju zdrav san. Sirovine koje upotrebljavamo rezultat su održivog kružnog gospodarstva. U izradi se upotrebljava reciklirano drvo i ljepila s minimalnim sadržajem otapala. Tako osmišljen životni prostor prati nas u mirnu noć i budi u svež dan.

FURNITURE FOR HEALTHY NIGHTS

In every home, the bedroom is one of the most private spaces, in which we spend many hours. In reality, we sleep during most of those hours, but it is still important that the bedroom is custom-made for us, in the colours we love and in well-conceived designs. What is even more important is that the materials from which it is made enable healthy sleep. The raw materials we use are the result of sustainability-oriented circular management, and recycled wood and adhesives with minimal solvent content are used in the manufacturing process. A living space that is thus created takes us into a peaceful night and awakens us to a fresh new day.

Nič ni bolj vabljivega kot mehko postlana postelja, urejena v skladu z našim načinom bivanja. Dopolnjujejo jo v prvi vrsti uporabni elementi, ki pa s svojo lepoto in naravnim videzom prinašajo v dom vtis zračnosti narave.

Nema ništa primamnije od meko namještenog kreveta, uređenog prema našem načinu življenja. Nadopunjuju ga prvenstveno korisni elementi koji svojom ljepotom i prirodnim izgledom u dom unose dojam prozračnosti prirode.

Nothing is more tempting than a soft bed arranged according to our way of life. It is complemented primarily by useful elements that, with their beauty and natural appearance, bring an impression of the airiness of nature into the home.

POHIŠTVO, KI PREDVIDEVA, ŽIVLJENJSKA PRESENEČENJA

NAMJEŠTAJ KOJI PREDVIĐA ŽIVOTNA IZNENAĐENJA
FURNITURE THAT FORESEES LIFE'S SURPRISES

Življenja ni mogoče popolnoma načrtovati, včasih imamo občutek, da se z nami igra ali celo iz nas norčuje. Tudi opremljanje spalnice je včasih težka naloga, potem pa se še spremenijo naše potrebe. Več kot dragoceno je zato zavedanje, da z nakupom spalnice ne bomo naredili nepopravljive napake.

Naše izdelke snujemo z mislijo na spreminjajoče se potrebe uporabnikov, zato so programi širši, imajo veliko različnih elementov in več barv, ročajev, njihova kvaliteta pa omogoča večkratno prestavljanje. Pri naših uporabnikih niso nič redkega dokupi ali spremembe v postavitvah. Ker nam je mar zadovoljstvo naših uporabnikov, nam manjši dokupi ali servis niso odveč.

Život nije moguće u potpunosti isplanirati, ponekad imamo osjećaj da se s nama igra ili nam se čak izruguje.

I opremanje spavaće sobe je ponekad težak zadatak, a naknadno se naše potrebe još i promijene. Stoga je više nego dragocjeno biti svjestan da kupnjom spavaće sobe nećemo napraviti nepopravljivu grešku.

Svoje proizvode osmišljamo imajući na umu promjenjive potrebe korisnika, pa su programi širi, imaju mnogo različitih elemenata i više boja, ručki, a njihova kvaliteta omogućuje višestruko premještanje. Dodatne kupnje ili promjene izgleda nisu neuobičajene kod naših korisnika. Budući da nam je stalo do zadovoljstva naših korisnika, manji dokupi ili servisi nisu nam gnjavaža.

Life cannot be completely planned; sometimes we have a feeling that it is playing with us or even making fun of us.

Even furnishing a bedroom is sometimes a difficult task, and then our needs change as well. Therefore, awareness that buying a bedroom will not be an irreversible mistake is more than valuable.

Our products are designed with changing user needs in mind, so the ranges are broader, they have many different elements and multiple colours, handles, and their quality allows for multiple shifting. Additional purchases or changes in the layout are not uncommon for our users. Because we care about the satisfaction of our users, small purchases or servicing are not a nuisance to us.

REGENERATION OF

Spanje je nujno potrebno za nemoteno telesno in duševno delovanje. Med spanjem poteka regeneracija celotnega organizma, še posebej pa je pomembna regeneracija možganov. Sevanje mobilnih naprav na ta proces vpliva negativno, zato ga želimo čim bolj omejiti. Tkanina, ki jo vgrajujemo v določene elemente, 99-odstotno prepreči prehod sevanja. Elementi so zasnovani tako, da smo preko mobilne naprave še vedno dosegljivi, sevanje pa se zmanjša na najmanjšo možno mero.

Spavanje je prijetno potrebno za nesmetano tjelesno i duševno funkcioniranje. Tijekom spavanja događa se regeneracija cijelog organizma, a posebno je važna regeneracija mozga. Zračenje mobilnih telefona na taj proces utječe negativno, zato ga želimo što više ograničiti. Tkanina koju ugrađujemo u određene elemente 99 % sprječava prolaz zračenju. Elementi su osmišljeni tako da smo putem mobilnog uređaja još uvijek dostupni, a zračenje se smanjuje na najmanju moguću mjeru.

Sleep is essential for smooth physical and mental functioning. During sleep, the regeneration of the entire organism takes place, with the regeneration of the brain being especially important. The radiation from mobile devices negatively impacts this process, so we want to limit it as much as possible. The fabric, which is built into certain elements, provides 99% protection against the passage of radiation. The elements are designed so that we can still be reached via a mobile device, while radiation is reduced to a minimum.
